

INK JET RECORDER

Patent number: JP6143555
Publication date: 1994-05-24
Inventor: MATSUI SHINYA; others: 09
Applicant: CANON INC
Classification:
- **international:** B41J2/01; B41J2/175; B41J29/00
- **europaen:**
Application number: JP19920324794 19921110
Priority number(s):

Abstract of JP6143555

PURPOSE: To reduce the size, thickness and cost of an ink jet recorder by embodying an electrostatic protection remedy of an electric circuit by a simple and compact structure without requiring an electrostatic protective circuit, etc., when a user charged with static electricity attaches or detaches a head cartridge, etc., to or from a carriage.

CONSTITUTION: When a cartridge having a recording head 4 is detachably mounted in a reciprocatingly movable carriage 3 and the carriage 3 is moved to a cartridge replacing position, a switching member for the carriage, a head cover 10, etc., is conducted to an electric ground member 1 via an earth member 17.
